What is a high voltage battery management system (LV BMS)?

Explore High Voltage BMS Optimize your vehicle's performance and safety with our Low Voltage Battery Management System (LV BMS). Designed for modern vehicles, our LV BMS ensures efficient battery protection, extended lifespan, and real-time monitoring.

What is a battery management system (BMS)?

Voltaplex is proud to design and manufacture battery management systems (BMS) that optimize lithium-ion battery packs' safety, reliability, and performance. We engineer our solutions for seamless integration across various industries, including robotics, automotive, and medical devices.

How do I create a custom battery management system?

Our process for creating custom battery management systems begins by developing BMS modules and custom BMS boards that manage your project's voltage, current, temperature, and data communication with total accuracy.

How does BMS calculate battery capacity?

The BMS calculates key battery metrics: State of Charge (SoC): The available battery capacity compared to its full capacity. State of Health (SoH): The overall health and aging status of the battery. Depth of Discharge (DoD): The percentage of battery capacity used during a discharge cycle. 05. Thermal Management

That's where the Battery Management System (BMS) comes in. Often called the brain of the battery, the BMS ensures your batteries operate safely, efficiently, and for as long ...

Our process for creating custom battery management systems begins by developing BMS modules and custom BMS boards that manage your project's voltage, current, temperature, ...

Very small and reliable BMS for your DIY Battery Pack Builds. These ...

Enhance your EV battery's performance with our High Voltage Battery Management System (HV BMS). Serving as the brain of your battery ...

10S Li ion Battery BMS will be applied on 36V Battery pack with full voltage of 42V output for electric bike lithium battery, electric scooter, or motorcycle 36V Rechargeable Battery system

A Battery Management System (BMS) safeguards lithium-ion batteries by monitoring voltage, current, and temperature, preventing overcharge, discharge, and thermal ...

A Battery Management System (BMS) is essential for ensuring the safe and efficient operation of battery-powered systems. From real-time monitoring and cell balancing to thermal ...

A Battery Management System (BMS) safeguards lithium-ion batteries by monitoring voltage, current, and temperature, preventing ...

Our process for creating custom battery management systems begins by developing BMS modules and custom BMS boards that manage your ...

A battery management system is an electronic system that protects a rechargeable battery (cell or battery pack) from running outside its safe operating area, monitors its state, calculates ...

Discover our advanced BMS solutions, designed to enhance performance, extend battery life, and provide reliable energy management.

There are many BMS design features, with battery pack protection management and capacity management being two essential features. We'll discuss how these two features work here.
