What Glass Technologies does Onyx Solar offer?

At Onyx Solar, we understand that every project is unique. To meet specific requirements, we offer two advanced photovoltaic (PV) glass technologies: amorphous silicon and crystalline silicon, both fully customizable.

What is Mitrex solar glass?

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where sustainability is clear as day. Where photovoltaics meet limitless design, where color meets clarity.

What is Sungate 400 glass?

Manufactured with a magnetron sputtered vacuum deposition (MSVD) "soft coat," Sungate<sup>®</sup> 400 glass helps buildings harvest energy from the sun and retain solar and furnace heat to reduce winter heating costs. Sungate<sup>®</sup> 400 delivers a winter U-value that is 9 percent higher than passive low-e glasses manufactured with a "hard" pyrolytic coating.

What type of glass is best for solar panels?

On a clear-over-clear double-glazed configuration, SNE 50 coated glass provides 48% visible light transmittance and 0.25 solar heat gain coefficient - making it suitable for projects in many regions. SunGuard SN 54 low-E coated glass strikes a balance between color neutrality and solar control - so your project can blend in or make a statement.

The Solarvolt BIPV glass system replaces traditional facade cladding materials and enhances commercial building exteriors by providing ...

The Solarvolt BIPV glass system replaces traditional facade cladding materials and enhances commercial building exteriors by providing sunshading, overhead glazing, CO<sub>2</sub>-free power ...

Sungate 400 glass is a highly transparent, passive low-e glass designed specifically for use in heating-dominated climates.

This innovative glass is designed to convert sunlight into electricity, combining the functional attributes of a building's envelope with the ...
