The project will implement a practical pilot demonstration to determine the suitability of using repurposed membranes in water treatment. ...

The 350kw system features 644 individual solar panels and floats on one of the treatment lagoons at the Drouin wastewater treatment plant. Gippsland Water said it is the ...

The project will implement a practical pilot demonstration to determine the suitability of using repurposed membranes in water treatment. Membranes result from water and wastewater ...

WWTPs are ideal candidates for solar PV systems, as they typically have large open spaces, high electricity demand, and long operating hours. Solar PV systems can also ...

Victorian regional water utility Gippsland Water has officially launched a 350 kW solar system that floats on one of the lagoons at the ...

Our effective solutions cater for different site requirements and we can custom design sewage and wastewater treatment plants to meet your specific needs and regulatory discharge limits.

Gippsland Water has switched on the largest floating solar array in Australia at the Drouin wastewater treatment plant.

This article provides an overview of harnessing solar energy for wastewater treatment plants, highlighting its relevance and importance ...

Both heterogenous and homogenous photocatalysis techniques employed for wastewater treatment are critically reviewed. For treating domestic wastewater, solar ...

One research focus area of the Task was the combination of solar thermal collectors with technologies for wastewater treatment. This work aimed to create an innovative and, above all, ...
