How much money has Iraq invested in irrigation?

In one project, he has invested a total of 1.2bn Iraqi dinars (\$800,000) so far. This amount is at least three times more than the estimated cost of growing wheat in an arable land with water readily available.

What keeps the farm in Iraq's desert green?

In the heart of Iraq's southern parched desert, a verdant oasis rises like a mirage. But this is no illusion -- it's a thriving farm kept lush and green by the power of the sprinkler irrigation system.

How can irrigation systems improve crop yields?

Some Iraqi farmers have started using modern irrigation systems like drip and sprinkler irrigation, which can reduce water usage by up to 50 percent and improve crop yields. These systems use tubing to deliver water directly to plants, contributing to sustainable agricultural practices.

In this context, this study primarily provides a value proposition and business case for supporting the water and irrigation sector in Iraq, and aims to evaluate the viability of investments in ...

To protect the region's food supply and economy, it's essential that farming becomes more water-efficient. This article explores innovative solutions from Egypt and Iraq, highlighting three ...
