What is the Addis Ababa AQMP?

The Addis Ababa Environmental Protection and Green Development Commission (AAEPGDC) and other partners developed the Addis Ababa Air Quality Management Plan (AQMP) as the next step in addressing air quality problems in the region.

Does Addis Ababa have air quality data?

Yes, air quality data is available for Addis Ababa. In addition to monitored data, satellite-based air quality data is available for the region. Van Donkelaar et al. (2019) developed a methodology to estimate PM_{2.5} concentrations using remote sensing data from satellite imagery.

Who developed the Addis Ababa Environmental Protection & Green Development Commission document?

This document was developed under a partnership between the Addis Ababa Environmental Protection and Green Development Commission, with support from the United States Environmental Protection Agency, the United States Embassy in Addis Ababa, and UN Environment.

Will infrastructure projects help reduce air pollution in Addis Ababa?

Overall, the infrastructure projects undertaken show a significant push towards improving the efficiency and low- to no-emission components of the transport and energy sectors, which will help reduce the burden of air pollution in Addis Ababa.

Addis Ababa City is one of the preferred African cities in 2022 where effective use of natural resources is carried out to ensure that it is healthy and ...

The objective of the study was to evaluate the quality of the Environmental Impact Statement (EIS) submitted to Addis Ababa Environmental Protection and Green Development ...

Given its location within the tropics, Addis Ababa experiences minimal seasonal variation in sunlight intensity as temperature changes are less significant than wet-dry periods ...
