Could the Vatican be powered by 100% solar energy?

The late Pope Francis' goal of powering the Vatican by 100% solar energy is happening now as Vatican City becomes the first fully powered solar state. This is pretty interesting as the Vatican joins a growing list of countries using 100% renewable energy. Perhaps even more intriguing is the way the Vatican did it - they used agrivoltaics.

Why does the Vatican have a solar system?

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an agrivoltaic solar plant to supply the Vatican with energy from Santa Maria di Galeria. On the same site, the new solar infrastructure now stands.

Does Vatican City have solar power?

Yes. Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia and the Democratic Republic of Congo to become one of just eight countries in the world to generate 100% of its electricity from renewable sources. Several church organizations around the world are making the move to solar.

How will the Vatican's new energy system work?

According to the Vatican's press office, the installation will apply the most advanced solutions currently available, balancing clean energy generation with the preservation of agricultural use, the region's hydrogeological stability, and the protection of its cultural and archaeological heritage (ZENIT News / Rome, 08.01.2025).-

The transition to solar energy as the main power source is the latest initiative of the Vatican to become more "green" and ecologically sustainable.

By May 29th, 2025, that vision was fulfilled, and the Vatican City became one of the only fully solar-powered states in the world, setting a clear precedent on how belief and ...

With the Apostolic Letter "Fratello sole," issued *motu proprio*, Pope Francis provides for the construction of an agrivoltaic plant in the extraterritorial zone of Santa Maria in ...
