A flexibly deployed energy storage charging solution can quickly respond to peak demand, enhance energy dispatch capabilities, and ensure uninterrupted operations.

Bidirectional electric vehicles employed as mobile batteries can be mobilized to a site prior to planned outages or arrive shortly after an unexpected ...

When county staff aren't using the Leafs for work activities, the vehicles plug into Fermata Energy's FE-20 bidirectional chargers. These specialized units can charge at 20 kW ...

When staff aren't using the Leafs as runabouts, they're plugged into any of four bidirectional chargers on site. These are made by Fermata Energy, which also developed the ...

Munich Airport, in collaboration with green energy company FlowGen, is testing an innovative mobile energy container equipped with ...

Over the next three years, the operator intends to build around 90 bi-directional charging points at Frankfurt Airport. If successful, the charging capabilities may be expanded ...

Over the next four years, a total of over five million euros will flow to Frankfurt Airport within the scope of Germany's program to promote electromobility. Fraport itself, ...

Bidirectional electric vehicles employed as mobile batteries can be mobilized to a site prior to planned outages or arrive shortly after an unexpected power outage to supplement local ...

Munich Airport, in collaboration with green energy company FlowGen, is testing an innovative mobile energy container equipped with photovoltaic panels and wind rotors to ...

This is particularly true if the charging process is also grid-optimized. This article presents a number of developments in automated and bidirectional BEV charging that will ...

Airport folding container bidirectional charging
