Algeria's mountainous north offers 2.3GW potential for pumped hydro storage, while concentrated solar plants (CSP) in the south are reviving thermal storage tech.

The Ministry of Energy and Mines (MEM), through national utility Sonelgaz, provisionally awarded contracts in 2023 for two major projects, totaling 3 GW. The 2 GW ...

Historically dependent on oil and gas, the country is tapping into its vast solar potential, with a series of large-scale solar projects, including the flagship M'ghair plant, which ...

The first component is a 2,000MW project that encompasses the construction of 15 solar PV plants across 12 provinces, with individual capacities ranging from 80MW to 220MW.

The city of Ghardaia has launched a solar-powered street lighting project to reduce electricity consumption. Some agricultural farms in Ouargla have started using solar-powered ...

The projects include a 220 MW plant in Batmet, a 200 MW plant in Gueltet Sidi Saad, another 200 MW plant in Douar El Maa and two 80 MW plants in Abadla and Ouled ...

The projects include a 220 MW plant in Batmet, a 200 MW plant in Gueltet Sidi Saad, another 200 MW plant in Douar El Maa and ...

The Biskra solar plant is just the beginning of Algeria's renewable energy journey. With ambitious plans to grow its solar capacity, the nation is positioning itself as a leader in ...

By the end of 2023, Algeria's total renewable energy capacity had reached 600.9 MW, which includes hydroelectric power. Without hydroelectric power, total capacity stood at ...

The project is divided into two primary components, with the first being the construction of 15 solar PV plants across 12 provinces, generating a total of 2,000MW. These ...
