The Athens Cooling Station 2.0 is an off-grid installation using solar power and rainwater for misting and cooling. It covers 50 square meters with ...

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency ...

During the last 10 years, the Institute for Environmental Research and Sustainable Development of the National Observatory of Athens has developed and operates a network of ...

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

The outer surface of the container is equipped with foldable photovoltaic panels, which can be folded up when not in use to reduce volume and weight for easy transportation ...

Compact & portable, they integrate foldable photovoltaic panels for swift deployment. Overcoming bulkiness of traditional mobile stations, these ...

EU Weather Station BESS Container delivers 6+ months of autonomy, survives Nordic cold/Med desert heat, and keeps C3S climate data flowing--no tricky maintenance runs!

Compact & portable, they integrate foldable photovoltaic panels for swift deployment. Overcoming bulkiness of traditional mobile stations, these containers offer efficient power supply, ...

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with ...

The outer surface of the container is equipped with foldable photovoltaic panels, which can be folded up when not in use to reduce ...
