Does Austrian power grid AG have a market transparency policy?

Austrian Power Grid AG is meeting these obligations and goes above and beyond the information required by law to give market players the highest possible degree of transparency. You will find all published data under Market transparency.

Can a microgrid operate in Austria?

Microgrids are generally able to operate in Austria. The legislative basis is the ElWOG, which applies to all electricity networks. Incentives must be assessed on a case-by-case basis. See also question 3.5 above.

Why is Austria allowing PV systems with PPAs to receive subsidies?

By enabling PV systems with PPAs to receive additional subsidies, the Austrian government is facilitating easier access to financing for developers of new projects. The revised guidelines are part of Austria's broader strategy to transition to a low-carbon economy and achieve its renewable energy targets.

Does Austria prohibit permanent geological storage of carbon dioxide?

Austria has chosen to prohibit permanent geological storage of carbon dioxide with very few exceptions for research purposes (Federal Act Prohibiting Geological Storage of Carbon Dioxide, Bundesgesetz, &#252;ber das Verbot der geologischen Speicherung von Kohlenstoffdioxid) and to evaluate international experience with CCS in five-year intervals.

Direct connection to the transmission grid by the renewable energy producer is possible for large power plants with grid connection over 110 kV and a minimum capacity of 5,000 kW.
