What impacts will Banka solar project have?

The ESIA reports have identified resettlement and livelihood impacts created by the Project. The LRP has been developed to mitigate the economic displacement impacts that will be created for Banka Solar. The RAP has been developed to mitigate the potential physical and economic displacement impacts that will be created for Bilasuvar Solar.

How does Banka solar affect biodiversity?

Procedures will be developed and implemented for the storage, reuse, recycling, or disposal of damaged or unused solar PV panels. With respect to the impacts on biodiversity, the Banka Solar area partly overlaps an internationally recognized key biodiversity area (KBA), specifically the Kura Delta Important Bird Area (IBA).

Will Banka solar affect bird priority biodiversity features?

CHA concluded that the development of Banka Solar will not adversely affect bird priority biodiversity features (PBFs), and no net loss will result from development of the Banka Solar to these PBFs. The Bilasuvar Solar area comes within 1 km of an internationally recognized KBA, specifically the Lake Mahmudchala IBA.

As the first independent, foreign investment-based "utility-scale" solar power plant, the project offers some level of confirmation that ...

The objective of the project is to support Azerbaijan's energy transition through expansion of renewable electricity generation.

Azerbaijan has taken a major step toward its low-carbon future with the final investment decisions (FIDs) for two landmark energy ...

As the first independent, foreign investment-based "utility-scale" solar power plant, the project offers some level of confirmation that Baku's efforts to get foreign investors to ...
