Battery pack assemblies typically require multiple fastening points to distribute mechanical loads evenly across the structure. Bonding fasteners excel in this application due to their ability to ...

From our wide range portfolio of over a million products and our know-how in fastening since 1927, we have selected the recommended fasteners for the electric vehicle industry, including ...

PEM's fastening solutions are smarter, stronger and more reliable than ever. Our comprehensive fastener portfolio is strategically designed to meet today's most critical EV and charging ...

Explore our range of fastening solutions for the intercell connect boards in your EV battery modules. Explore high-quality fastener solutions for your modular EV battery design, helping ...

Clean, cost-effective and high-performing fastening solutions for electric vehicle battery tray applications. Learn more about PennEngineering's full line of eMobility solutions here.

Square and round pierce-clinch nuts for cost-optimised manufacture of non-detachable steel and aluminium metal fastenings on the battery frame. Innovative thread-tapping screws that ...

Our new BCON+ high voltage connection system is a versatile, compact, robust, and touch-safe solution for interconnecting cell modules inside a traction battery and high voltage connection ...

Discover innovative fastening solutions from Stanley Engineered Fastening, catering to diverse applications in Electric Vehicles, Aerospace, Renewable Energy, Construction and beyond.

Technology-leading automated no-hole fastening and mechanical joining systems including stud welding and self-piercing riveting, plus cordless ...

PEM's fastening solutions are smarter, stronger and more reliable than ever. Our comprehensive fastener portfolio is strategically designed to meet ...
