What is a genset on a reefer container?

A generator set ensures that reefer containers have power when there is no regular power source available. The generator is normally mounted on the front of a reefer container; in those cases, it is a clip-on genset. The genset can also be attached to the chassis of the container, in these cases, it is called an underslung genset.

Are Jenbacher containers available for gas engines?

Jenbacher containers are available for Type 2, 3, 4 and 6 gas engines. Our containerized solutions ensure excellent reliability for your power and heat generation needs.

What is the standard ventilation temperature for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to $+34^{\circ}\text{C}$. All genset containers are also available with an option for -40°C and most variants can be upgraded for $+45^{\circ}\text{C}$. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements.
