The RD-HVBMSCT800BUN is a complete reference design bundle for 800 V high-voltage battery management systems. It provides a BMU, a CMU and a BJB, software drivers and a functional ...

Designed for up to 32-cell battery pack configurations, this development kit delivers a scalable foundation for distributed BMS deployments in electric vehicles, energy storage systems, and ...

NXP offers a comprehensive suite of software solutions for battery management systems (BMS), including production-grade device drivers, ...

Buy Battery Management Development Kits. Newark Electronics offers fast quotes, same day dispatch, fast delivery, wide inventory, datasheets & technical support.

Discover our advanced BMS solutions, designed to enhance performance, extend battery life, and provide reliable energy management.

NXP offers a comprehensive suite of software solutions for battery management systems (BMS), including production-grade device drivers, safety libraries (SL), application examples, real-time ...

Advanced battery management systems featuring distributed and centralized architectures for electric vehicles, energy storage, and industrial applications worldwide.

foxBMS is a free, open and flexible research and development environment for the design of Battery Management Systems (BMS). Above all, it is the first universal hardware and software ...

The ISL78714BMS5XBKIT1Z is a development kit that facilitates testing of the ISL78714 Li-ion battery pack analog front-end ICs and the Renesas ...

With our very flexible kit you can built 3 different BMS topologies (LV single node, centralized access, dual access ring), combining and adding the boards you need to set up your BMS ...
