Your battery's journey isn't over -- it's just beginning. At AmericanElectric, we recycle lithium batteries to reduce waste, recover materials, and power a cleaner future.

This advanced bootcamp provides technical professionals with the skills to evaluate, model, and implement Battery Management Systems (BMS) for EV and stationary storage platforms.

Our team of experts can help you find the perfect BMS for your custom battery pack. Contact us for assistance or visit our Battery Design Tool to start designing your pack today.

A Battery Management System (BMS) is an intelligent component of a battery pack responsible for advanced monitoring and management. It is the brain behind the battery and plays a critical ...

A Battery Management System (BMS) is an intelligent electronic system that monitors and manages the performance of a lithium battery pack. It ensures safety, optimizes ...

A BMS monitors the temperatures across the pack, and open and closes various valves to maintain the temperature of the overall battery within a ...

Expert Battery Pack and BMS Test Systems from DMC, Inc. Our experienced team delivers customized solutions tailored to your specific needs.

A battery management system (BMS) is any electronic system that manages a rechargeable battery (cell or battery pack) by facilitating the safe usage and a long life of the battery in ...

A BMS monitors the temperatures across the pack, and open and closes various valves to maintain the temperature of the overall battery within a narrow temperature range to ensure ...

A Battery Management System (BMS) is an electronic control unit that monitors and manages rechargeable battery packs to ensure safe operation, optimal performance, and ...

For experts, anticipating a reconditioning or replacing an existing BMS in a battery can be a challenge. Our solution has been designed to meet most of these needs with a single card.
