How much energy do solar panels produce in Buenos Aires?

Average 4.43kWh/day in Autumn. Average 3.22kWh/day in Winter. Average 6.29kWh/day in Spring. To maximize your solar PV system's energy output in Buenos Aires, Buenos Aires, Argentina (Lat/Long -36,-59.9964) throughout the year, you should tilt your panels at an angle of 31°; North for fixed panel installations.

Is smart glass a good choice for Buenos Aires?

Ideal for Buenos Aires' subtropical climate and its very humid summers, Smart Glass is a smart choice thanks to its aesthetic appeal and ability to save money by reducing energy costs. Located on South America's southern coast, Buenos Aires is the capital of Argentina as well as its largest city.

How to optimize solar generation in Buenos Aires?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Buenos Aires, Buenos Aires, Argentina as follows: In Summer, set the angle of your panels to 20°; facing North. In Autumn, tilt panels to 41°; facing North for maximum generation.

Is Buenos Aires a good place to get solar energy?

Buenos Aires, Argentina is a pretty decent place for generating solar energy throughout the year. The amount of electricity you can get from solar panels varies with the seasons. In summer, each kilowatt of installed solar power can produce about 7.75 kilowatt-hours per day.

If you can adjust the tilt angle of your solar PV panels, please refer to the seasonal tilt angles below for optimal solar energy production in Buenos Aires, Buenos Aires, Argentina.
