Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO2. In March 2024, ...

However, in recent years, Chile has been facing some serious issues: curtailment and marginal costs nearing zero. With solar project owners needing to find a solution to make ...

Three utility scale battery energy storage projects co-located with solar plants were announced last week in Chile.

Chile's Environmental Assessment Service (SEA) and the National Electric Coordinator approved the project after a technical review, which confirmed its grid connection ...

Located in the Atacama Desert in northern Chile, this megaproject will have a total capacity of 2 GW of photovoltaic generation and 11 GWh of lithium-ion battery storage, ...

Storage project announcements are coming thick and fast as co-location with wind turbines offers cost efficiency and a smoother generation profile. Meanwhile, new capacity ...

Chilean solar energy is surging with significant price drops in battery storage, enhancing the country's energy transition. The costs of lithium-ion batteries have fallen by 50% ...

However, in recent years, Chile has been facing some serious issues: curtailment and marginal costs nearing zero. With solar project ...

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift ...

Acciona Energia's decision to retrofit their Chilean solar plant with a massive 1GWh battery system isn't just another project announcement--it's a glimpse into how rapidly ...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's largest solar and storage projects once fully operational.

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The ...
