Can battery energy storage modernize the grid in Argentina?

The... Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Why is Argentina a good stance on energy storage?

In Argentina,the stance provides a good lesson to the European stakeholders,especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Are micro-grids a viable option for rural communities?

The capital costs of setting up micro or mini-grids or stand-alone home solar systems,especially in rural communities,are generally beyond the limited financial capabilitiesof families/communities,and innovative financing methods need to be expanded,aiming to increase electricity access,as well as the overall related quantitative data.
