In September 2020, KONCAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we ...

The battery storage system provides energy balancing and maintains grid stability on the island of Vis. The system operates on Li-ion batteries which enable rapid response, both in the terms of ...

The battery system will have a discharge capacity of 38 MW and a storage capacity of up to 70.8 MWh, designed to operate for around twenty years. An environmental ...

Part of these funds will be used to expand the capacity of the liquefied natural gas terminal, and the rest of the money will go to the green transition, so around 500 million euros ...

This battery storage system is pivotal for Croatia to achieve its renewable energy targets, particularly by smoothing out the intermittency of sources like wind and solar.

In September 2020, KONCAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we contracted the development of the 1 MW battery ...

The Croatia Split Energy Storage Project represents a crucial step in balancing tourism-driven economics with sustainable energy practices. By addressing specific regional needs through ...

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...
