With 60% of its electricity already coming from hydropower, the country is now blending old-school reservoirs with futuristic battery tech. Think of it as a "Swiss Army knife" ...

Imagine a giant battery that can power 15,000 homes during peak hours while reducing carbon emissions equivalent to taking 8,000 cars off the road. That's exactly what this Swiss ...

The new professorship "Electrical Energy Storage Systems" seeks to develop advanced storage technologies that will enable a reliable and sustainable ...

The new professorship "Electrical Energy Storage Systems" seeks to develop advanced storage technologies that will enable a reliable and sustainable energy supply. On the one hand, we ...

The new 18 MW energy storage system is located at an existing substation in Volketswil, near Zurich. It can power the equivalent of the daily electricity consumption of 600 ...

Battery energy storage PCS solution for EKZ, one of Switzerland's largest energy companies BESS 1 MW / 250 kWh PCS solution at the Dietikon Power Plant in Zurich, Switzerland.

This article dives into the location, technology, and impact of Zurich's energy storage power station, with insights into its role in Europe's clean energy transition.

This article explores how Switzerland's largest city is integrating advanced storage solutions to overcome renewable energy's intermittency challenges while boosting grid reliability.

Zurich, Switzerland has become a hotspot for energy storage photovoltaic systems, blending Alpine innovation with environmental consciousness. With 42% of Switzerland's electricity ...

We produce an innovative, cost-effective battery designed for extended energy storage, making it ideal for large-scale stationary storage solutions and seamless integration ...
