CATL unveiled the TENER Stack, the world's first 9MWh ultra-large capacity energy storage system solution set for mass production at EES Europe 2025, representing a ...

After announcing the world's first commercialized sodium-ion battery pack for electric vehicles that can travel more than 300 miles on a single charge, it has now launched ...

Designed for mass production, the innovative system represents a major step forward in addressing growing global energy needs, from AI-driven data centres to industrial ...

Compared to traditional 20-foot container systems, it boasts a 45% increase in space utilization and a 50% boost in energy density. With a single-unit capacity of 9MWh, the ...

“To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL ...

“The TENER Stack isn't just a product--it's a global energy accessibility solution,” said Hank Zhao, CTO of ESS Europe at CATL. “9MWh isn't the ceiling. Every future leap in ...

Compared to traditional 20-foot container systems, TENER Stack improves volume utilization by 45% and energy density by 50%, with a single-unit capacity of 9MWh. ...

In response to logistical challenges associated with transporting containers exceeding 36 tonnes, the legal threshold in many ...

Compared to traditional 20-foot container systems, TENER Stack improves volume utilization by 45% and energy density by 50%, ...

Today, CATL has unveiled an even more robust version called the TENER Stack. Standing 20 feet tall, this

ultra-large capacity ESS ...

With a storage capacity of up to 9 MWh, the system can charge about 150 regular electric vehicles (EVs) or power an average German home for six years, according to CATL. ...

Designed to meet rising global energy demands driven by AI data centers and industrial electrification, the TENER Stack leverages CATL's advanced high-energy-density ...
