The Port of Barcelona is preparing to deploy electric charging and hydrogen supply infrastructure in anticipation of the road transport sector's transition to a zero-emission ...

As cranes hoist battery containers instead of shipping crates, Spain's ports are rewriting the rules of energy economics. The question isn't whether to invest, but how fast you can navigate this ...

The Port of Barcelona is preparing to deploy electric charging and hydrogen supply infrastructure in anticipation of the road transport ...

The paradox of fast charging: while fast charging reduces charging times, its high energy intensity poses additional challenges to ...

Hutchison Ports BEST (Barcelona Europe South Terminal) terminal, located in the Port of Barcelona, Spain has installed 1,832 solar panels on almost 5,000 m² of its buildings.

This is thanks to the installation of a new photovoltaic system on the vehicle silo at Valencia Terminal Europa (VTE), which alone ...

The project, which began in December 2024, will see 1,674 solar panels installed on various rooftops in the terminal. This will include 502 panels with a nominal power of 655 ...

Planning a new solar factory? Learn why efficient port logistics are crucial for success and what lessons Spain's top maritime hubs offer ...

It is a key part of the Port of Barcelona's energy transition plan, which aims achieve 50% emissions reduction by 2030 and to be a carbon-neutral port by 2050.

The paradox of fast charging: while fast charging reduces charging times, its high energy intensity poses additional challenges to the grid and may require targeted investments ...
