-----

In this paper, we propose a hybrid system composed of tethered and untethered UAVs.

Explore how Free-Space Optical Communication integrated with UAVs and energy harvesting enhances 5G+ networks, offering high bandwidth and ...

In this study, a hybrid system incorporating both wired optical communication and free-space optical communication was designed, and its performance was analyzed.

FSO-based network technologies have distinct advantages over RF-based network technologies. For communication lengths ranging ...

With its high data rate comparable to fiber optics and its ability to operate in an interference-free optical spectrum, Free-Space Optical ...

Building on the need for energy-efficient UAV-mounted RIS networks, this paper proposes a dual EH framework integrating different RF EH protocols as well as solar energy to ...

The HJ-SG-R01 series communication container station is an advanced energy storage solution. It combines multiple energy sources to provide efficient and reliable power.

Explore how Free-Space Optical Communication integrated with UAVs and energy harvesting enhances 5G+ networks, offering high bandwidth and efficient connectivity.

Abstract Researchers are increasingly focusing on free space optical (FSO) communication as a high-speed wireless communication solution for both back-haul and fronthaul networks in 5G ...

The HJ-SG-R01 is designed to integrate multiple green energy sources such as solar, wind power, and diesel generators. This makes it ideal for remote areas in Australia where grid ...
