Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential ...

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various ...

Our Solarfold(TM) containers use Lithium Iron Phosphate (LiFePO4) batteries, which offer superior safety, longer lifespan (3000+ cycles), and better performance in extreme temperatures ...

When deployed, the container slides panels out on all sides to form a large solar field, yielding 20-200 kWp of solar generation. Up to 500 kWh of lithium battery storage ...

With its stackable and expandable architecture, it is easy to scale capacity and maintain. Safety and reliability are paramount, with maximum protection provided by the robust LFP battery and ...

Whether integrated with solar PV or operating independently, this commercial solar battery storage system ensures reliable backup power and peak ...

Whether integrated with solar PV or operating independently, this commercial solar battery storage system ensures reliable backup power and peak shaving for businesses, industrial ...

Lithium-ion battery energy storage systems contain advanced lithium iron phosphate battery modules, BMS, and fuse switches as DC short circuit protection and circuit isolation, all of ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.
