This 57.5-megawatt battery energy storage system, approved in the 2023 Integrated Resource Plan Update, will store excess energy ...

From distributed energy's economic potential to the challenges of federal policy uncertainty, these speakers unpacked what it takes to build a grid that is resilient, affordable ...

State resourcing plans are increasingly updating battery energy storage systems (BESS) plans, especially those tied to solar.

Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by 2027, outpacing every other Southeastern state. Driven by economic growth and evolving grid ...

With the help of new federal funding, Oglethorpe Power plans to add three large battery storage systems, each with a capacity of 25 megawatts, to its fleet around the metro ...

Georgia Power has requested state energy regulators to approve nearly 10,000 megawatts of new energy resources, including a mix of gas turbines, solar, and battery ...

The plan aims to expand renewable energy capacity by procuring up to 4,000 MW by 2035 and integrating over 1,500 MW of battery energy storage systems, enhancing Georgia ...

Georgia Power has requested state energy regulators to approve nearly 10,000 megawatts of new energy resources, including a ...

From distributed energy's economic potential to the challenges of federal policy uncertainty, these speakers unpacked what it takes to ...

Georgia Power is enhancing grid reliability and sustainability through Battery Energy Storage Systems (BESS), supporting clean, safe, and affordable energy for 2.8 million ...
