This pilot aims to secure an initial 50 MW of capacity, providing opportunities for residential and small commercial customers to add solar and storage resources. The goal is to ...

We work closely with Georgia's universities to identify cutting-edge research regarding energy storage and provide companies with access to the latest applied research.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage ...

The Southwest Atlanta Energy Storage project is an innovative battery energy storage project proposed for Fulton County, Georgia that features ...

Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by 2027, outpacing every other Southeastern state. Driven by economic growth and evolving grid ...

Although the state is just starting to explore the possibilities of battery energy storage, Georgia has been a hotbed for renewable energy development since the passage of ...

In a clearing 30 minutes outside Columbus, Georgia Power is almost finished installing what it says will be the state's largest battery storage facility yet, a 65-megawatt ...

In this article, we will explore the specifics of these battery storage projects, their anticipated benefits, and Georgia Power's broader ...

It will utilize lithium iron phosphate Tesla Megapack 2 XL batteries, which will be paired with an existing solar project at the base. It's expected to be online in 2026.

Although the state is just starting to explore the possibilities of battery energy storage, Georgia has been a hotbed for renewable energy ...
