The government has set a target of 5 GW of energy storage capacity by 2030 and recently finalized an auction for 1 GW of new projects. The auction attracted 45 bids totaling ...

This article highlights key steps recently taken by the Greek State as regards the legal/regulatory framework and appropriate State aid schemes, to kickstart electricity storage activity and allow ...

As he noted, " Since 2022, renewables have dominated the country's energy mix," with RES -- including hydropower -- covering 50.5% of electricity production in 2024. Meanwhile, lignite ...

The plan combines large-scale RES, battery storage and a high-capacity data centre, illustrating how decarbonisation and digital growth can go hand-in-hand. Similar ...

The plan combines large-scale RES, battery storage and a high-capacity data centre, illustrating how decarbonisation and digital ...

Greece's energy market is set for major change in 2026, with seven key milestones including lignite phase-out, energy storage, major interconnections, carbon capture projects, ...

Building on the experience of other IEA member countries, Greece could improve the scheme and increase energy savings through 2030. As the Greek building stock is older than the EU and ...

This article highlights key steps recently taken by the Greek State as regards the legal/regulatory framework and appropriate State aid schemes, to ...

The Seli Project entails the construction of a 309 MW photovoltaic unit with an integrated lithium-ion battery energy storage system. This project aims to optimise electricity generation and grid ...

Energy production and storage is crucial to integrate renewable energy sources into the Greek electricity system, with a goal of having battery storage capacity of 3.1GW by ...
