---

Guinea plans to build the country's first solar power plants to increase its electricity production by 15% and cut its reliance on West African neighbors.

This structuring project is fully in line with the vision of the President of the Republic, General Mamadi Doumbouya, who has ...

In Guinea, a country grappling with significant energy challenges, two towns are making strides towards sustainable development with the recent inauguration of solar ...

This new project will increase the reliability of the power system by storing solar energy during the day for use during evening ...

Solar power leadership, off-grid innovations, supportive policies, energy storage solutions, and technological advancements are shaping the trajectory of renewable energy in ...

This structuring project is fully in line with the vision of the President of the Republic, General Mamadi Doumbouya, who has instructed the Government to resolutely ...

Guinea-Conakry has inaugurated a 200 KW solar photovoltaic plant in Siguirini, designed to supply electricity to more than 800 households and reach approximately 72,000 ...

The two plants will make Guinea's energy system stronger, greener and more reliable, bringing an extremely affordable new energy source into a ...

In Guinea, a country grappling with significant energy challenges, two towns are making strides towards sustainable ...

The government's energy strategy calls currently is oriented towards investment in the electricity distribution infrastructure installation of commercial scale solar.

This new project will increase the reliability of the power system by storing solar energy during the day for use during evening peak hours. This will reduce the need for thermal ...

The two plants will make Guinea's energy system stronger, greener and more reliable, bringing an extremely affordable new energy source into a historically fossil-fuel-dominated (and ...
