How to control base stations without HTC Vive or Valve Index?

You can control the power of the base stations without HTC Vive or Valve Index by linking it to the start and end of SteamVR. SteamVR has a feature to automatically turn on the base stations when SteamVR starts and sleep them when SteamVR ends. However, this feature does not work without HTC VIVE or Valve Index.

What if I have problems with my power management settings?

If you're having problems with your Power Management settings, please click Contact Steam Support to get help. If you are using VR in a shared tracking space with multiple instances of SteamVR running, turn off Base Station Power Management to avoid power state conflicts. Base Station compatibility?

How do I Turn on a base station?

Press the Channel buttons at the back of the base stations so that one base station is set to channel "A", while the other is set to channel "b". Once turned on, do not move or adjust the angles of the base stations as it could disrupt the tracking process.

How do I configure a base station on SteamVR?

Navigate to the SteamVR status window. Wait for SteamVR to identify nearby base stations, then either select Automatic Configuration or manually change each channel by clicking on it. Base Stations packaged with VR Kits are configured to channels 1 and 2. Individually purchased Base Stations have their channels set between channels 3 and 16.
