Do solar lights need replacement parts?

The proper maintenance combined with replacement parts is vital for solar lighting to provide prolonged performance. The identification of solar light components enables users to solve problems, make system improvements, and select proper replacement parts.

What are the components of a solar light system?

The essential solar light components consist of fixtures which contain LED bulbs and come in wall light and solar lantern designs. The functionality of solar lighting systems increases through the addition of motion sensors and controllers and mounting brackets as accessories.

What are the components of a solar night light?

The solar night light consists of a 4 piece solar flame unit with a high output of instant radiant heat and a built-in 200mAh battery. It also includes a side ducted exhaust with a back draft stopper and a thermal safety switch.
