What is a yard master electric projector screen?

The Yard Master Electric is Elite Screens outdoor projector screen for patios and other outdoor spaces. Watch a movie in the convenience of your own backyard, patio, pool deck, or wherever your creative innovation leads. The electric screen is raised and lowered using a Radio Frequency remote control.

Do LED screens need a lot of power?

This article will guide you through the specifics of power consumption for indoor and outdoor LED screens, with a focus on the panels we use. LED panels are known for their efficiency, but they still require substantial power, especially when displaying bright images at high brightness levels.

How high should electrical wires be above a pool?

Electrical service wires overhanging a pool, spa, or hot tub must be at least 22 1/2 feet above the surface of the water or surface of the diving platform. Data transmission wires (telephone, internet, etc.) must be at least 10 feet above the surface of the water in pools, spas, and hot tubs.

How do power screens function?

Power screens function by covering large openings to reduce heat, glare, and create a bug-free environment. With multiple fabric and openness options, you can choose to knock down the glare, keep a bug-free environment, and preserve your view. Options include full blackout material or clear vinyl.
