How much does a 20 kW solar panel cost?

On average, a 20 kW solar panel system costs \$55,000, according to real-world quotes on the EnergySage Marketplace from the first half of 2024. However, your price may differ; solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 20 kW solar panel system in your state.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?

Are solar panels a good investment in Arizona?

The average 20 kW solar panel system in almost-always-sunny Phoenix, Arizona produces about 35% more electricity than that same system installed in seasonally-sunny Boston, Massachusetts. (That said, you don't have to live in Arizona for solar to be a good option for your home. Solar is a smart investment wherever electricity rates are high).

Our mobile solution for mining and construction - PowerHub is easily transported to the service area in a single 20-foot shipping container by plane, truck or ship. It is pre-wired and ...
