Israel Electric Corporation (IEC) for electricity. According to UNCTAD, the Palestinian Territory "lies above sizeable reservoirs of oil and natural gas wealth" but "occupation continues to prevent Palestinians from developing their energy fields so as to exploit and benefit from such assets." In 2012, electricity

The plan was completed around 4 years ago, and the total cost amounted to about 1.24 billion dollars broken down over 10 years. There is an urgent need to review and amend ...

The electricity crisis in the Gaza Strip is an ongoing and growing electricity crisis faced by nearly two million residents of the Gaza Strip, with regular power supply being provided only for a few hours a day on a rolling blackout schedule. Some Gazans and government institutions use private electric generators, solar panels and uninterruptible power supply units to produce power when regular power is not available.
