How much does a home battery cost in New Zealand?

Battery prices are coming down, but the upfront cost is still significant. On average, home batteries in New Zealand range from \$800 to \$1,200 per kilowatt-hour (kWh) of storage, depending on the brand and installation requirements.

How much does a solar battery cost in New Zealand?

The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget. The best value was \$9,000 for a 9.6 kWh battery, equating to \$937.50 per kWh. Indicating the batteries below \$1000/kWh can be hunted down in the NZ market. What's Next for Solar Prices in 2025?

Why do New Zealand homes need battery storage?

In most New Zealand homes, a large proportion of the energy produced by solar panels is sent back to the grid because it's generated when it's not needed, i.e., the middle of the day. However, adding home battery storage to a new or existing solar power system allows you to store your unused energy.

How much does a battery system cost?

Overall Costs: The average total price paid for a battery system is \$14,396, indicating that energy storage is still a significant investment for many. The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget.
