Should you put an EV charger outside?

When charging in your garage, you'll be able to control the weather, which can help you if you live in hot and humid climates where the outdoors can cause charging station issues. Additionally, if you want to use your car on rare occasions (like when visiting family), having an EV charger outside can make it easier to get it running again.

Should you install an outdoor charging station?

If so, you are not alone. Fortunately for residents and business owners alike, installing an outdoor charging station does not have to be a death sentence for your battery. A well-designed charger is built to work in all weather conditions, even direct exposure to the elements.

Is an outdoor EV charging station right for You?

An outdoor charger is far less expensive and easier to install yourself. The downside is that once it's out there in the rain and snow, it's susceptible to rust and damage from regular use. If money is no object or you live in an area with temperate weather all year long, an outdoor EV charging station might be right for you. VI.

Should you use a car charger outside?

The benefits of outdoor charging stations are plentiful, and the dangers are minimal. Charging your car outside is a smart option if you have the space. One last thing to consider is the quality of your car charger's enclosure. Although many chargers can be used outdoors, quality chargers will keep you safe in all weather conditions.
