What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

How many m³ of wastewater can a containerized wastewater treatment plant handle?

We have experience with containerized wastewater treatment plants for up to 1,380 PE or 207 m³ of wastewater per day. A wastewater treatment plant is only as effective and efficient as the installed system.

How much energy does a containerized wastewater treatment plant use?

No planning or buildings are required to operate a containerized wastewater treatment plant - the plant simply needs to be placed on a solid base. This saves costs in advance, and the system is also highly efficient during operation: a 20-foot container only needs 13 kWh/d. Container.One, Container.One+, Container.Pro and Container.Xtra.

What is a containerized package plant?

Containerized package plants offer a portable, plug-and-play solution for water and wastewater treatment. They are ideal for remote locations, emergency response, or temporary needs, providing flexibility and convenience without compromising on treatment quality. PACKAGE PLANTS | CONTAINERIZED CONVENTIONAL TREATMENT PLANTS

A modular containerized wastewater treatment plant is a prefabricated system installed in standard containers, offering fast deployment, scalable capacity, and flexible operation.

Our containerized wastewater treatment plants are not only installed in hard-to-reach places abroad, but also offer the perfect solution for short-term, temporary wastewater treatment in ...

Containerized Waste Water Treatment Typical Applications For Containerized Sewage Treatment Biocell Containerized STP Capacities and Approvals How Do Containerized STPs Treat Wastewater?
