Even though Huawei doesn't manufacture batteries, the company is putting plenty of R& D resources into developing a new solid-state battery tech. ...

Huawei, the Chinese tech giant, has filed a patent for a sulfide-based solid-state battery that boasts an energy density of 400-500 Wh/kg, two to three times higher than the ...

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres ...

As is known to all, solid-state batteries have no risk of electrolyte leakage and high energy density, making them an ideal choice for the next generation of power batteries.

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R& D resources into developing a new solid-state battery tech. The newest patent reveals a battery ...

By filing a new patent for a high-density battery design, the company is entering a race already crowded with big names like BMW, ...

The 1MW/4MWh all-vanadium liquid flow battery energy storage project built by Dehai Aike for Xizi Clean Energy has enabled Xizi Clean Energy's demonstration factory to achieve non-stop ...

Chinese tech giant Huawei has filed a new patent for a sulfide-based solid electrolyte that aims to upgrade lithium-ion batteries by replacing unsustainable liquid ...

Huawei doesn't even make EV batteries, you might say -- and you'd be right. But they've been quietly getting serious about battery materials and electrolyte synthesis, signaling ...

Discover 20 emerging flow battery startups to watch in 2025 & find out how their solutions will impact your business!
