With vast areas of land dedicated to solar power, the nation aims to significantly increase its solar energy production in the coming years.

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining ...

Iran's arid and semi-arid climate necessitates innovative strategies to address interlinked water and energy challenges. Floating solar photovoltaic (FSPV) systems offer a ...

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, ...

Iran is in talks with several leading Chinese companies to develop solar power plants and battery energy storage systems (BESS) as part of its strategy to increase ...

In addition to constructing new power plants, Iran is also enhancing its solar panel production capacity. The Islamic Republic News Agency (IRNA) reports the upcoming opening ...

TEHRAN - Iran has issued permits for 29,000 megawatts ...

Iran's Supreme Council for Economic Coordination (SCEC) has approved the allocation of \$1.5 billion for the installation of solar panels in response to the country's ongoing ...

TEHRAN - Iran has issued permits for 29,000 megawatts (MW) of solar power capacity, reflecting growing private sector interest in renewable energy. However, the Planning ...

Constructing 29 solar farms is a monumental undertaking that requires a deep understanding of photovoltaic technology and logistics. The journey from a government permit ...
