The LC29H series can track L1+L5 dual-frequency and multi-GNSS signals, reducing multipath effects in urban canyons and improving positioning accuracy while maintaining low power ...

The RTK Base Station does not include, but requires a high-quality GPS/GNSS triple band (L1/L2/L5) antenna. In order to get the best performance we recommend using one of our triple ...

In this section, you will setup two Piksi Multi outdoors. One will work as a base station (stationary) and another as a rover (moving). The ...

FJD RTK base station is used to provide radio RTK correction signal, to ...

Normal GPS positioning, only requires you to place the device near a window and it will provide you a GPS location over a period of time. But that's not enough for RTK. For the ...

The RTK Base Station does not include, but requires a high-quality GPS/GNSS triple band (L1/L2/L5) antenna. In order to get the best ...

The BAICells MBS31001C Nova436Q Base Station Power Supply with GPS Antenna is a crucial component of a Baicells Nova4G LTE network. This power supply and GPS antenna ...

Normal GPS positioning, only requires you to place the device near a window and it will provide you a GPS location over a period ...

FJD RTK base station is used to provide radio RTK correction signal, to achieve centimeter level accuracy of the positioning and navigation system. It correct GNSS signal to achieve 2.5cm ...

Using the same telemetry module to connect Mission Planner, the base station data will be transmitted through the telemetry module to the Here3 rover module on the UAV.
