How many residential buildings in Israel have gone solar?

Only a handful of residential buildings in Israel have gone solar due to multiple obstacles, one of which is that a residents' committee cannot secure a bank loan. An apartment building fitted with solar panels (but not storage) in the southern city of Beersheba, through the Sun for All initiative. (Yuval Pan)

Can solar panels be installed on a single family home?

Solar panels on a single family home. (Smileus at iStock, Getty Images) Varied tariff options, shortened payback periods, tax incentives, and fast-track connection to the grid were among several steps announced Tuesday by the Energy Ministry to launch a campaign to get solar panels onto 15 percent of Israel's residential roofs by 2030.

Are solar panels a good investment?

Together, they will generate 1.6 gigawatts of installed capacity -- a tenth of what's needed to reach the government's goal of generating 30 percent of electricity from renewables by 2030. Energy Minister Eli Cohen told a press conference in Jerusalem that solar panels promised a return on investment of at least 15% annually over 25 years.
