HiTHIUM and El-Mor Renewable Energy form a strategic partnership to develop 1.5GWh of long-duration battery storage projects, enhancing grid stability and solar integration in Israel.

To help Israel's industrial and commercial energy transition, GSL Energy and Deye have jointly created a highly efficient and flexible energy storage demonstration project.

Israel has signed a concession agreement to build a new solar power facility with integrated battery storage at the Ashalim energy complex in the Negev, a project expected to ...

Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that ...

In an effort to drive the country to deploying more energy storage, the Israeli Ministry of Energy and Infrastructure has announced four large-scale battery storage projects.

To help Israel's industrial and commercial energy transition, GSL Energy and Deye have jointly created a highly efficient and flexible ...

JinkoSolar today announced it has delivered a 10MWh of DC-side battery storage system to Israel. With this pre-installed high energy density ESS, which is scalable, controllable, and ...

Under the agreement, EL-Mor will design and build battery energy storage systems (BESS) and related infrastructure for multiple projects, with a total capacity of 1.5GWh and a total power of ...

Israel is advancing its clean energy ambitions with the approved expansion of the Halutziot solar project. Spearheaded by Enlight Renewable Energy, this development will ...
