All this information is scrutinized in attempts to understand in detail the origin and evolution of the solar system--a goal toward which astronomers continue to make great strides.

Along with the sun, our cosmic neighborhood includes the eight major planets. The closest to the sun is Mercury, followed by Venus, Earth, and Mars. These are known as terrestrial planets, ...

Learn facts about the solar system's genesis, plus its planets, moons, and asteroids. The sun keeps the planets in its orbit with a tremendous ...

Beyond the Sun, the Solar System consists of eight planets, five recognized dwarf planets, over a million known asteroids, 644 moons ...

The solar system comprises the Sun, all the objects gravitationally bound to it, and the heliosphere, an enormous magnetic bubble enclosing most of ...

Review your understanding of the solar system in this free article aligned to NGSS standards.

Inside the Sun's core hydrogen is fused into helium for billions of years, releasing energy which is over even longer periods of time emitted through the Sun's outer layer, the photosphere. This ...

evolutionGeneral characteristicsSunInner Solar SystemOuter Solar SystemTrans-Neptunian regionThe Solar
System consists of the Sun and the objects that orbit it. The name comes from Sol, the Latin name for the Sun.
It formed about 4.6 billion years ago when a dense region of a molecular cloud collapsed, creating the Sun and
a protoplanetary disc from which the orbiting bodies assembled. The fusion of hydrogen into helium inside the
Sun"s core releases energy, which is primarily e...

Learn about the solar system in astronomy. Get its definition, discover the planets in order, and get interesting facts.

Learn facts about the solar system"s genesis, plus its planets, moons, and asteroids. The sun keeps the planets in its orbit with a tremendous gravitational force.

The solar system comprises the Sun, all the objects gravitationally bound to it, and the heliosphere, an enormous magnetic bubble enclosing most of the known solar system, ...

So let us embark on a voyage across the solar system, stopping at each of the eight major planets, gazing in awe at their wonders and discovering what they can teach us ...
