-----

An "unbelievable appetite for clean energy" is pushing the developer of Gemini, the US's largest co-located solar-plus-storage power plant, to pursue opportunities of a similar scale.

Discover how large-scale energy storage systems boost grid flexibility, enable renewables, and power a cleaner, reliable future.

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

There are over 1,350 major energy storage projects currently in the database, representing more than 108,000 MWh of capacity. The list shows that there are more than 185 ...

Terra-Gen and Mortenson have announced the activation of the Edwards & Sanborn Solar + Energy Storage project, the largest solar-plus-storage project in the United ...

The California Energy Commission (CEC) is reviewing a pair of enormous solar + storage projects proposed by Intersect Power subsidiaries that, if constructed, would each ...

Located in Maricopa County, Arizona, the project includes a 550MW solar farm and its supporting deployment of a 2,200MWh battery storage system. The project will be ...

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt ...
