-----

Launched in March 2025, it is the first European-level tool of its kind, providing a real-time dashboard of energy storage levels in Europe, offering energy storage data across a ...

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

At TLS, we don't just build containers -- we engineer functional enclosures tailor-made for energy systems. From the freezing grids of Northern Europe to the sun-scorched ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. ...

As an emerging energy harvesting pavement technology, the photovoltaic (PV) pavement, which combines mature photovoltaic power generation technology with traditional ...

Smart energy hubs along highways that integrate multiple renewable energy resources, storage devices, and consumption points using advanced ...

Smart energy hubs along highways that integrate multiple renewable energy resources, storage devices, and consumption points using advanced controls, communication, and data analytics.

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

It supports the EU's Solar Energy Strategy, which emphasizes the need to promote innovative forms of PV deployment. It further supports initiatives at the sub-national level, ...

Discover how the LFP Battery-Powered BESS Container is shaking up the EU's energy storage game--70% market share by 2025, 95% recyclable, 6,000+ cycles, and way ...
