The Middle East is one of the sunniest regions in the world -- making it an ideal location for solar power. But while abundant sunshine is a major advantage, environmental ...

Despite having almost limitless reserves of oil, the kingdom is embracing solar and wind power, partly in an effort to retain a leading position in the energy industry, which is ...

Hybrid solar-assisted air conditioners, which combine photovoltaic (PV) energy with traditional AC technology, are being explored in low-rise residential and commercial buildings across the UAE.

As the world gathers for COP28 in Dubai, a pivotal moment in the global fight against climate change, GREE, the world's best-selling HVAC manufacturer as per ...

Solar air conditioning (SAC) can be categorized into closed and open cycle systems. Closed cycle systems have thermally motivated chillers which provide cooled water.

Learn how the Middle East is advancing HVAC decarbonization through sustainable technologies, renewable energy, and forward-thinking regulations.

With the region experiencing extreme temperatures and frequent power shortages, solar-powered air conditioners offer a sustainable alternative that reduces dependence on ...

Recent research and developments in solar thermal cooling technologies in the Middle East & North Africa (MENA) region are summarized. Solar thermal pilot projects in the ...

In this study, a solar hybrid cooling system for an institutional building is investigated, which combines solar photovoltaic (PV) technology with traditional vapor ...

Learn how the Middle East is advancing HVAC decarbonization through sustainable technologies, renewable energy, and forward-thinking ...
