What is a small power inverter?

Small Inverters. Our Small Inverter category includes inverters generally ranging from 125 watts to 2000 watts in 12 and 24-volt capacities. These small power inverters are great for smaller applications like boats, RVs, or other relatively smaller systems. In addition to the size, choosing an inverter with the right wave form is also important.

How much does a micro inverter cost?

They typically cost \$1,000 or more than a string inverter on a standard 5kW residential solar installation. However, they allow for a much easier system expansion than a string inverter and ensure greater energy savings. It means that in the long term, micro inverters for solar systems may turn out to be cheaper than conventional inverters.
