The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

Ingrid Capacity, renowned for optimizing grid-scale battery storage and flexible assets across Europe, entered a strategic partnership with SEB Nordic Energy in September ...

Initial construction of the battery storage project -- which has a capacity of 5 megawatts and 10 megawatt-hours -- began in the third quarter of 2024, and it is expected to ...

"Think of supercapacitors as the sprinters of energy storage," says Dr. Lena Fjellström, project lead at Nordic Energy Research. "They're not here to replace marathon ...

Key trends include the use of artificial intelligence and machine learning to improve storage operations, facilitating smarter energy management and better grid services. ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial ...

A report from BloombergNEF indicates global energy storage deployment is expected to exceed 300 gigawatts by 2030, reflecting a tenfold increase from 2020 levels. ...

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will ...

Initial construction of the battery storage project -- which has a capacity of 5 megawatts and 10 megawatt-hours -- began in the third ...
