What is the Dublin Energy Hub?

The Dublin Energy Hub, housing the largest battery, serves as a testbed for the future of clean energy in Ireland. It is envisioned as a hub for integrating various green technologies, including offshore wind, hydrogen, and carbon capture and storage, all working together to power a sustainable future for the Emerald Isle.

Where is the Poolbeg battery energy storage system located?

The Poolbeg Battery Energy Storage System is located at our Poolbeg Energy Hub in Dublin where some of the latest technologies will support the future delivery of renewable energy including batteries, hydrogen and offshore wind will be deployed over the next decade.

What is a battery energy storage system?

The company said the battery energy storage system (BESS) is part of a pipeline of projects in Dublin and Cork which have an investment cost of up to EUR300m. The batteries can store excess renewable energy for discharge when required, and in doing so help to support Ireland in reaching its climate targets.

Where have we hosted the facilities at the Irish Open?

We have hosted the facilities at the Irish Open at Portrush as well as Microsoft and our head office in Dublin.

ESB has officially opened a battery plant at its Poolbeg site in Dublin which will add 75MW (150MWh) of energy storage to help provide grid stability and deliver more renewables ...

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale ...

Operational since November last year, the project has the capacity to provide 75MW of energy to Ireland's electricity system for ...

Ireland takes a leap towards clean energy with its largest battery storage facility. Explore the benefits of this 150 MWh project.

It is located at Poolbeg Energy Hub, where ESB - around 95% owned by the Irish state with the remaining stake held by its employees - is planning to deploy a combination of ...
