How much does a 15kW solar system cost in the Philippines?

Be sure to review the warranty terms and conditions offered by your installer and equipment manufacturers. The average cost of a 15kW solar system in the Philippines typically ranges from PHP 900,000 to PHP 1,500,000, depending on the factors discussed above. This cost includes solar panels, inverters, mounting systems, and installation labour.

Should you invest in a 15kW solar system in the Philippines?

Investing in a 15kW solar system can offer substantial long-term savings. With the high cost of electricity in the Philippines, the payback period for a solar system can be as short as 5-7 years. After this period, the system essentially provides free electricity, offering an excellent return on investment.

How much electricity does a 15kW system use in the Philippines?

Over a year, this translates to about 22,000-27,000 kWh of electricity. Given the average electricity consumption in the Philippines, a 15kW system can cover the entire energy needs of larger homes or small businesses.

What is a 15kW solar system?

A 15kW solar system is a photovoltaic (PV) system designed to generate up to 15 kilowatts of electricity per hour under optimal conditions. This size is ideal for larger households with high energy consumption, small businesses, or even commercial establishments.
