Let's cut to the chase: When you hear "Pretoria Libreville Energy Storage Power Station," do you imagine giant batteries humming in the African sun? You're halfway there.

The first ever solar-plus-storage hybrid resources system in the Philippines is now in operation after energy company AC Energy (ACEN) switched on the site's battery energy storage ...

As South Africa's energy storage poster child, the Pretoria Twin Creek Energy Storage Power Station proves that keeping the lights on doesn't have to be boring.

In January 2024, the City of Tshwane Council approved a plan to lease Pretoria West power station and Rooiwal power station to private operators for 40-year leases.

Given its unique pumping and power generation capacity, the new mixed pumped-storage power station with an installed capacity of 1.2 million kW is expected to support new energy-based ...

As South Africa accelerates its transition to renewable energy, projects like the Pretoria Energy Storage Power Station are drawing global attention. This article explores the feasibility, ...

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

The base serves as a living lab for next-gen storage solutions. They're currently testing AI-driven predictive maintenance models that could extend battery lifespan by up to 15 years.

Proximity to industrial parks necessitates meeting industrial demand for dispatchable energy. The City Council, facing financial constraints, plans to lease out the ...

With an installed solar capacity of 540 MW of PV, and a battery storage capacity of 225MW/1,140MWh, the plant is designed to deliver 150 MW of dispatchable power from 5 am ...
